

Kendall Carll, M.D.

ORTHOPEDIC SPINE SURGERY

Dr. Kendall Carll is a board-certified, fellowship-trained orthopedic spine surgeon who founded Spine Care of North Texas in 2018 to better serve patients seeking high-quality, individualized care for their neck and back issues.

Having been a surgical patient himself, Dr. Carll understands that neck and back pain can be life altering and debilitating. His mission is to help patients receive a comprehensive diagnosis and detailed treatment plan so they can get relief from their pain and return to their prior lifestyle. He guides patients through the steps of conservative care by working closely with physical therapists, chiropractors, and pain management specialists. If conservative treatment fails and surgery is needed, he places a focus on minimally invasive procedures utilizing the latest techniques in spinal surgery. Dr. Carll has a strong track record of success, giving patients the best odds of a smooth surgery with minimal complications and a shorter recovery time.

Dr. Carll is qualified as a Surgeon of Excellence by MPIRICA Health, meaning he performs better than 90% of his peers nationwide. He has been named among the Best Doctors in Dallas and Collin County multiple times in *D Magazine* through the years. He is a member of the American Academy of Orthopaedic Surgeons, North American Spine Society, and Texas Orthopedic Association.
