

Bala K. Giri, M.D.

NEUROSURGERY AND SPINE SURGERY

Dr. Bala Giri and his highly trained team of healthcare professionals focus on the care of spinal and neurosurgical conditions. With advanced neurosurgical training, Dr. Giri has the expertise to work on the spinal skeleton while respecting the delicate nature of the nervous system. His goal is to see patients return to normal activity and have the best possible quality of life after treatment or surgery.

Dr. Giri is a strong proponent of working with patients to explore all possible treatment options before surgery. In cases where surgery is the best choice, Dr. Giri uses the latest minimally invasive techniques utilizing neuronavigation and robotics, which results in less pain, shorter hospital stays, and rapid recovery. He offers leading-edge neurosurgical spinal care for conditions of the spine, brain, and peripheral nerves, such as herniated disc, degenerative disc disease, fractures, spinal tumors, osteoporosis, brain tumors, aneurysms, ulnar neuropathy, and carpal tunnel syndrome.

Dr. Giri is board certified by the American Board of Neurological Surgery. He has practiced for more than 20 years and served as the chief of spine surgery and neurosurgery at Methodist Dallas Medical Center. Dr. Giri has been invited to perform surgeries and lecture internationally due to his expertise. He graduated with honors from Johns Hopkins University and Medical School. In addition to his Best Doctors in Dallas recognition yearly since 2004, he has been a featured neurosurgeon on local and international news programs and the Discovery Health Channel. Dr. Giri is on staff at Methodist Dallas Medical Center and Methodist Hospital for Surgery.

EDUCATION
