

BRET REDMAN

## Sam Jejurikar, M.D., M.B.A.

### PLASTIC SURGERY

There are many reasons patients choose Dr. Sam Jejurikar for their plastic surgery needs: Beautiful, natural-looking results top the list. Another reason is his outgoing personality and fun, caring nature. "I am pretty talkative with patients and often get caught up in conversations with them," Dr. Jejurikar says. "People notice that I truly treat them the way I would my own family. I am honest when we discuss their desired procedures, and if I don't think a patient is ready for surgery or would get the result they want, I let them know. I want them to have a positive experience."

Dr. Jejurikar specializes in a wide range of plastic surgery procedures and is frequently sought after for his excellent results in facelifts, eyelid surgery, mommy makeovers, tummy tucks, breast surgery, and liposuction. He is committed to providing his patients with the latest, most innovative approaches in aesthetic plastic surgery. Whether a patient wants to appear more youthful or desires a complete change, he partners with them from consultation to beyond the surgery to reach their goals. Patients often mention his caring nature, meticulous attention to detail, and an unwavering passion for plastic surgery as reasons they return to him and refer others. He considers it an honor to craft surgical and noninvasive solutions for his patients' individual needs.

Because of his skills and training, Dr. Jejurikar is proud to participate in a unique opportunity to serve on medical mission trips, including one in conjunction with Smile Bangladesh, where he provides medical services to impoverished children in Bangladesh on an annual basis and serves on its board of directors. Whether across the world or in Dallas, Dr. Jejurikar feels blessed to help others when a need arises. He is board certified in plastic surgery, a member of numerous professional aesthetic organizations, and a Diplomate of the American Board of Plastic Surgery. He has written chapters and authored papers in numerous publications about plastic and reconstructive surgery.
