

Luis Antonio Mignucci, M.D.

NEUROSURGERY AND SPINE SURGERY

Under the leadership of Dr. Luis Mignucci, Neurospine Surgical Consultants continues to provide unparalleled medical care to the residents of Dallas-Fort Worth and surrounding areas that he has served for more than 33 years in the North Dallas and Plano areas. Dr. Mignucci is once again honored to be recognized by his peers as among the Best Doctors in Dallas.

Dr. Mignucci graduated from the University of Puerto Rico School of Medicine department of neurological surgery. He completed his spine fellowship at the prestigious Cleveland Clinic Foundation and pursued additional specialized training at the National Hospital for Nervous Diseases at the University of London. Dr. Mignucci is one of the few neurosurgeons in the United States certified by both the American Board of Spine Surgery and the American Board of Neurological Surgery. To further enhance his expertise, Dr. Mignucci has participated in multiple clinical trials related to spine care and is actively involved in the design of advanced medical devices and equipment. During his 33 years of practice, Dr. Mignucci has developed special interest and mastery in the surgical management of spinal tumors and spine conditions, including scoliosis and spondylolisthesis. Additionally, he performs minimally invasive procedures to treat ruptured discs in the cervical, thoracic, and lumbar spine.

The Windhaven Medical Plaza provides a comprehensive and convenient venue for patients' medical needs. It also houses Windhaven Medical Imaging, which has the most advanced 3T MRI equipment. Patients can be evaluated and undergo diagnostic studies, often on the same day, thereby enabling them to obtain an immediate solution. The Windhaven Ambulatory Surgery Center provides patients with a state-of-the-art surgical facility in the same location, staffed by a highly trained and compassionate, professional personnel.

The medical team at Neurospine Surgical Consultants offers the latest technologies in the diagnosis and management of adult neurosurgical conditions, as well as the evaluation and nonsurgical treatment of acute and chronic musculoskeletal disorders.
