

Patty Fleming, D.D.S.

ORTHODONTICS

Dr. Patty Fleming, a board-certified orthodontist, is known for providing picture-perfect smiles to patients of all ages and is sought after for her results for children, teens, and adults. She stays current with the changing innovations in dentistry and orthodontics by attending continuing education on a regular basis. While creating beautiful smiles is a mainstay of orthodontics, Dr. Fleming also specializes in identifying and treating children and adults with breathing disorders, such as sleep apnea. She also enjoys collaborating with dentists and other dental specialists on complex cases involving missing teeth, implants, and/or jaw surgery. Dr. Fleming has also taken a special interest in identifying and treating sleep and airway disorders in patients of all ages.

Dr. Fleming has been consistently recognized as a leader in her field by both her colleagues and patients. She has been featured as a Best Dentist in *D Magazine*, a Texas Super Dentist® by *Texas Monthly*, a Best Orthodontist by *Living Magazine*, and a Mom-Approved Dentist by *Dallas Child*. She has also been nominated to be a member of several prestigious dental honor societies, including the Omicron Kappa Upsilon National Dental Honor Society, Gamma Pi Delta Prosthodontic Honor Society, and the Gorgas Odontological Honorary Society.

Treating children and teens is primarily the main population most people think of when it comes to orthodontics. However, Dr. Fleming says adults are one of the largest growing populations of people seeking orthodontics. Dr. Fleming offers several cosmetic alternatives to traditional metal braces, such as clear aligners, lingual braces, and clear braces, to address the increasing demands for adults wanting to improve their smiles.

"We live in an age where people pay attention to the way we look," Dr. Fleming says. "An improved smile boosts self-confidence, which leads to greater success in all areas of life. At Fleming Orthodontics, we combine clinical expertise with the most current orthodontic techniques. We make orthodontics simple, convenient, and affordable to provide beautiful smiles for all individuals from children to adults."

Dr. Fleming, born and raised in Northern Virginia, attended the University of Virginia for her undergraduate degree in sports medicine. She earned her dental degree at the University of Maryland School of Dentistry where she met her husband, Brent. They moved to Dallas to complete her three-year orthodontic residency at the Texas A&M College of Dentistry.
