ProDental Dallas

PROSTHODONTICS, PEDIATRIC DENTISTRY, AND ENDODONTICS

Dr. Jason Roe, prosthodontist, created ProDental Dallas, a state-of-the-art, boutique-style practice where each patient is treated as family. With prosthodontics, endodontics, pediatrics, and an on-site lab, ProDental Dallas has grown to a premier location for centralized dental care. Dr. Roe says, "Our core values of honesty, compassion, excellence, and innovation create an atmosphere that continues to draw many patients through our doors. We believe each person deserves access to excellent dental care in a central location." Centralization keeps it convenient for the patient and increases excellence with doctor-to-doctor communication. Each ProDental specialist is a *D Magazine* Best Dentist.

Dr. James Browning, prosthodontist, joined ProDental Dallas in 2021. Dr. Browning spearheaded ProDental's digital revolution. With his expertise, surgeries are digitally pre-planned and guides are fabricated on-site to increase patient outcomes. Additionally, digital scanning devices, milling machines, and 3D printers were added to give prosthodontists more options over their patients' prosthetic treatment, a decrease in treatment time, and a decrease in patient costs. Dr. Browning's motto is "Modern Dentistry. Traditional Values." He has a gentle chairside manner and a good sense of humor.

Dr. Jon McClure, pediatric dentist, joined the team this year with the addition of ProDental Kids! Dr. McClure and Dr. Roe studied together in undergraduate and graduate school and share similar treatment philosophies and values. Children now enjoy ProDental as much as their parents and grandparents. Dr. McClure's motto is "Parent focused; Kid friendly." This translates to quality time with Dr. McClure and his team for an enjoyable experience in an environment where parents can have their questions answered and trust their child is safe.

Dr. Rick Finley, endodontist and owner of Finley Endodontics, also finds his home at ProDental Dallas. Since 2014, Dr. Finley has provided ProDental patients fast access to root canals. "It's great to share space," Dr. Finley says. "We enjoy the camaraderie, but patients get the best benefit. They receive multiple specialty opinions many times without leaving the dental chair."
