

Matthew McBride D.D.S., M.S.

ORTHODONTICS

Dr. Matthew McBride became familiar with orthodontics long before he studied the specialty. As a child, he wore expanders, braces (three times), and had two jaw surgeries. His time in the dental chair produced a beautiful, healthy smile as well as a passion for dentistry and orthodontics. He always had an artistic inclination and loved science. Inspired by his own orthodontist, he realized he could combine his interests with orthodontics. "With my own personal history, I felt like I was in a good position to empathize with other patients," Dr. McBride says. "I'm able to talk them through it and understand their concerns, as I have a unique perspective."

A west Texas native, Dr. McBride later moved to Dallas and graduated from W.T. White High School. Following his education at Baylor College of Dentistry, he decided to open his orthodontic practice in Plano where he has practiced for nine years, treating both children and adults. His training in biomedical sciences sparked his interest and passion in the development of the teeth and jaws. "Early intervention can make positive life-long changes in my young patients, which I find very rewarding," he says. "Orthodontics is about more than straightening the teeth. Airway and function are also important."

He and his experienced staff take pride in their friendly, welcoming office where each patient feels personally cared for. "We consider them family and keep up with their big life events," Dr. McBride says. "We know our work has a big impact on their lives. This is more than a business; it's a personal connection that goes far beyond the dental work we do. Having straight teeth makes people feel good about themselves and can provide self-confidence to get to the next steps in life."

Dr. McBride, board certified by the American Board of Orthodontics, teaches part-time in the orthodontics department at the Texas A&M College of Dentistry. In his spare time, Dr. McBride likes to maintain an active lifestyle and loves snowboarding. He attends Upper Room Church and accompanies the LEAP foundation on mission trips to Belize to provide dental services to those in need.
