

Yash Avashia, M.D.

PLASTIC SURGERY

Dr. Yash Avashia, "Dr. Yash," is a highly accomplished, board-certified plastic surgeon specializing in cosmetic procedures for the nose, face, breast, and body. He is a partner at the Dallas Plastic Surgery Institute, which is well-regarded as the top facility in aesthetic surgery throughout the country. Dr. Yash has published more than 70 articles and textbook chapters on various subjects in plastic surgery, with a large focus in rhinoplasty and facial rejuvenation. He combines world-class training with his concierge level of patient care to deliver both outstanding results and a memorable plastic surgery experience to his patients.

Dr. Yash believes each patient has a unique, personal reason for pursuing plastic surgery. His goal is to help each patient find harmony between what they want and what they see. Patient education is a critical aspect of this process, and Dr. Yash dedicates undivided attention to educating his patients on the best options to achieve their goals.

Patients seek his expertise in rhinoplasty and revision rhinoplasty, ethnic rhinoplasty and nonsurgical rhinoplasty, surgical and nonsurgical facial rejuvenation, radiofrequency skin treatments, breast surgery and complex revision breast surgery, mommy makeovers, and scar optimization and revisional procedures. However, Dr. Yash's most requested procedures are rhinoplasty and revision rhinoplasty.

While many of Dr. Yash's patients are from the Dallas area and throughout the state, he also has a large number of patients who travel long distances for his customized approach that utilizes cutting-edge technology. Dr. Yash uses an anatomic, structural approach enhanced with piezoelectric crystalline energy for bone sculpting to provide unparalleled precision and detail to reshaping the nose.

As a partner at the Dallas Plastic Surgery Institute, Dr. Yash operates at the facility's AAAASF-accredited cosmetic surgery center, equipped with state-of-the-art technology to ensure every procedure is performed with optimal levels of comfort, safety, and precision. Additionally, his patients have full access to the EpiCenter Skin Care and Laser Center for post-operative treatments and year-round care.
